

New Own Style

Define Yours

2019 - 2020 COLLECTION

www.nos-helmets.com

New Own Style – New Rules

Our Staff is composed by passionate riders dedicated since 1982 in providing Top Level Brands and products in the motorcycle market; with the experience collected – for which there are no shortcuts – and with the constant dedication put developing concretely innovative shapes, models, details and colors in line with the needs of the actual riders, we proudly developed NOS Helmets.

NOS Green – New Colors, New Concepts

Strongly identifying, it's the color of nature and hope, associated since ancient times with positive emotions, has no precedent in the world of Motorsport. With the intention to transmit these values and attention to details directly to you, every particular of the helmet is designed with the utmost care like the hand-made sewing stitch, realized with a smooth, highly resistant NOS Green wire. We know the excitement you can feel wearing a helmet that fits just perfectly; where it and simply just enjoy your ride.

New Needs, New Own Style: Define yours

Thanks to more than 35 years of experience, selecting the best raw materials and developing truly innovative solutions, we wanted to create a helmet able to satisfy the needs of the actual modern riders, whose choices are based on canons and trends which go far beyond the rigid schemes we were used until recently. Take advantage of the smartness of NS-8 connecting with your fellow riders, enjoy the long time comfort of NS-6 or fully

perceive the feeling of freedom and safety of NS-1.

Our Pride - Our Identity

Everything starts from here; The NOS logo express the identity, the origins and the experience of which we are truly proud.

Dynamic and versatile in its two different forms, its symmetry and the strong symbols enclosed incarnate the attention to the details on which the NOS Helmets philosophy is based.

Your Protection - Our Responsibility

We know the pleasure you can feel wearing a comfortable and cool helmet but here in NOS, we never forget which is its real function:

protect your head.

That's why every aspect of the helmet construction has been deeply analyzed; from the selection of the best raw materials to the innumerable in-house testing impacts, from the development of multiple densities EPS shells, to the selection of highly durable inner liner fabrics, we truly perceive the responsibility towards you and we work every day at our best to deserve your trust.

Put us to the test, define your New Own Style.

New Own Style

NS8

Always connected with NS-8, the perfect companion for those riders who would never stop traveling! Join the sense of protection of a full face, with the practicality of a jet helmet and take advantage of the invisible pre-installed microphone, ready to be connected to your exclusive NOS-3S Intercom or SENA 3S.

The inner liner is designed to maintain an optimal level of comfort even after hours of riding and can be modified to achieve the optimal fitting and stability both in open and close position.

The MACH-Efficiency ventilation system maintains a cool temperature inside the shell while the air ducts and the Sunvisor mechanism are easy to operate, even wearing gloves.

NS7C CARBON

Simply the "non plus ultra" of the NOS Range in terms of protection, comfort, customization and technology, NS-7C Carbon is dedicated to those riders who don't want any compromise.

Every single Carbon Shell is completely hand-made by specialized technicians in order to ensure the perfect positioning and coupling of every component.

Thanks to this we are able to obtain an extremely rigid and resistant shell, without negatively affecting the weight of the helmet which is only 1.250 grams.

The Inner Shell is built using two different densities of EPS to maximize the absorption capacity of the helmet, while the hand-sewn inner liner can be completely customized to fit perfectly the head of the rider.

NS7F

Define your fit.

Dedicated to those riders who want to join the technology of a racing helmet, with the level of finishes and comfort typical of the NOS Helmets philosophy.

Customize completely your NS-7F inner liner thanks to the different thicknesses of cheek-pads and interior pads and relish the feeling of a helmet that fits just perfectly for you.

Thanks to the radial application technique, the outer shell is produced in MFC (Multiple Fiberglass Composite) a solution able to ensure the same level of protection but reducing the overall dimensions of the helmet, with big advantages in terms of weight and aerodynamic resistance.

The Double D chinstrap always ensure the right level of tightness and comfort while the ventilation system, jointly with the fine breathable inner fabrics, provide a constant supply of fresh air inside the helmet shell.

Emergency Pull Release System

Developed to enhance even more the level of protection offered by your NS-7F or NS-7C Carbon, the Emergency Pull Release System allows rescuers to remove the helmet from the user's head without generating dangerous twisting of the neck or the spine of the rider. Just grab the "Emergency Pull" red label on the neck-pad and pull to remove the cheek-pads.

It's not something we are obliged to do but in NOS Helmets, we know how small details, can make big differences in terms of safety.

Emergency Pull Release System

Developed to enhance even more the level of protection offered by your NS-10, the Emergency Pull Release System allows rescuers to remove the helmet from the user's head without generating dangerous twisting of the neck or the spine of the rider.

Just grab the "Emergency Pull" red label on the neck-pad and pull to remove the cheek-pads.

It's not something we are obliged to do but in NOS Helmets, we know how small details, can make big differences in terms of safety.

NOS Helmets In Shop Display

To position immediately NOS Products in the mind of customers maximizing the visibility of the NOS Helmets details inside the Shop, we realized a Display with a strongly institutional image paying particular attention to:

- Highlight the coherence with the NOS Helmets Brand Image
- Best helmets-exposed/display-size ratio (with the possibility to expose up to 12 helmets)
- Modular Design: the display can be positioned next to a wall, or in the middle of the shop; each expositor can display from 4 to 12 helmets and can be used alone or in combinations of 2 or more modules.
- Easy to ship and assemble, it can be mounted in minutes

The NOS Helmets In Shop Displays will be delivered to the NOS Helmets Official Dealers with the first supplies of the 2018/2019 Season.

New Own Style

NS-6

NS-6 represents the perfect solution for the Urban Rider that doesn't want to give up safety, offering all the features that you would expect to find on the most prestigious top of the range helmets.

The all-day comfort is guaranteed by the fully customizable interior while the easy to operate integrated Sunvisor, ensure the optimal level of visibility in every riding condition.

The HRPolymer shell offers the best combination between strength, weight and flexibility while the multiple densities EPS liner optimizes even more the absorption capacity.

New Own Style

NS1

NS-1 include all the features you expect in a modern helmet combined with a compact and classic design.

The hand-sewn inner liner details demonstrate the attention to details typical of NOS Helmets while the micrometric chinstrap, the integrated Sunvisor and the light-weight shell, incarnate the dynamism you are looking for your Urban Mobility.
