SPECIFICATION

Tested Model	Jaguar F-Pace 20d AWD, RHD
Body Type	- 5 door SUV
Year Of Publication	2017
Kerb Weight	1874kg
VIN From Which Rating Applies	- all F-Paces
Class	Small Off-Road

General comments

The Jaguar F-Pace shares much of its structure with the Range Rover Velar, tested by Euro NCAP in October 2017. Tests have been performed where differences might be expected but in some cases the results of the Velar have been used for this assessment.

Comments

The passenger compartment of the F-Pace remained stable in the frontal offset test. Protection of the knees and femurs was good for both dummies and a similar level of protection is provided to occupants of different sizes and to those sat in different positions. In the full-width rigid-barrier test, protection of the chest of the rear passenger was rated as marginal, based on dummy readings of rib compression. Otherwise, protection of the driver and rear passenger was good or adequate. In both the side barrier test and the more severe side pole impact, protection of all critical body areas was good and the F-Pace scored maximum points. Tests on the front seats and head restraints demonstrated good protection against whiplash in the event of a rear-end collision. A geometric assessment of the rear seats indicated marginal whiplash protection. The F-Pace has a standard-fit autonomous emergency braking system. Tests of the functionality of this system at the low speeds at which many whiplash injuries occur showed good performance, with collisions avoided at almost all test speeds.

Comments

In the frontal offset test, protection of the 6 year and 10 year dummies was good or adequate, except for the neck of the 10 year dummy, protection of which was rated as marginal, based on dummy readings of neck tension. In the side barrier impact, protection was good for all critical body areas of both dummies. The front passenger airbag can be disabled to allow a rearward-facing child restraint to be used in that seating position. Clear information is provided to the driver regarding the status of the airbag and the system was rewarded. All of the restraint types for which the F-Pace is designed could be properly installed and accommodated in the car.

AEB Pedestrian	6 Pts
System Name	Autonomous emergency braking
Type	Auto-Brake with Forward Collision Warning
Operational From	5 Km/h
Additional Information	Defaults on for every journey; operates above 40km/h and in low ambient light

PERFORMANCE ■	Autobrake Function	
	Avoidance	Mitigation
Running Adult crossing from Farside	Collision avoided up to 40 km/h	Impact mitigated up to 60 km/h
Walking Adult crossing from Nearside -25%	Collision avoided up to 40 km/h	Impact mitigated up to 60 km/h
Walking Adult crossing from Nearside -75%	Collision avoided up to 40 km/h	Impact mitigated up to 60 km/h
Running Child from behind parked vehicles	Collision avoided up to 40 km/h	Impact mitigated up to 60 km/h

Comments

The protection provided to the head of a struck pedestrian was predominantly good or adequate over most of the bonnet surface, with some weak and poor results recorded on the stiff windscreen pillars. The bumper provided good protection to pedestrians' legs while protection of the pelvis areas was more mixed, with good and poor results recorded. The autonomous emergency braking system can detect pedestrians and, in tests of this functionality, performed well, with scoring maximum points with collisions avoided or mitigated in all test scenarios.

PERFORMANCE | 

	Autobrake Function Only	Driver reacts to warning
Operational Speed	5-85 Km/h	30-80 Km/h
Approaching a stationary car	See AEB City	Crash avoided up to 45km/h. Crash speed reduced up to 80km/h.
Approaching a slower moving car	Crash avoided up to 60km/h. Crash speed reduced up to 70km/h.	Crash avoided up to 80km/h.
FOLLOWING A CAR AT SHORT DISTANCE		
Car in front brakes gently	Mitigation	Avoidance
Car in front brakes harshly	Mitigation	Avoidance
FOLLOWING A CAR AT LONG DISTANCE		
Car in front brakes gently	Mitigation	Avoidance
Car in front brakes harshly	Mitigation	Avoidance

Comments

Tests of the autonomous emergency braking system at highway speeds demonstrated good performance, with collisions avoided or mitigated in all tests. A seatbelt reminder is standard equipment for the front and rear seats, as is a driver-set speed limiter and lane-departure warning system.
