### Dettagli della vettura testata

Modello testato	Nissan Qashqai 1.6 'Visia' 2WD, LHD
Tipo carrozzeria	5 porte Translation not found
Anno di pubblicazione	2007
Peso	1311kg

Vista anteriore ISOfix	<input type="checkbox"/>	Numero di identificazione veicolo (VIN) a cui si riferisce la valutazione	Applicabile a tutti
Vista posteriore ISOfix	<input checked="" type="checkbox"/>		applies Qashqais

## Commenti

### Impatto frontale

Apart from the driver's chest, maximum points were scored for the protection offered to both the driver and passenger dummies. Double seatbelt pretensioners ensured that the driver's forward movement was very limited, keeping the knees and femurs well away from the dashboard.

### Impatto laterale contro vettura

The Qashqai scored maximum points in the side impact and pole tests

### Bambini

The car scored maximum points based on the measurements recorded by the two child dummies in the front and side tests. The passenger airbag can be disabled to allow a rearward-facing child restraint to be used in that seating position. However, information provided to the driver regarding the status of the airbag is not sufficiently clear. The presence of ISOFIX anchorages is not clearly marked.

### Pedoni

The bumper scored maximum points for the protection it offered to pedestrians' legs. In contrast, the front edge of the bonnet scored no points. The bonnet was rated predominantly fair for the protection offered to the head of a struck child.
