

Fun for one, fun for all.

Yamaha's kids' bikes have been introducing children and their families to the fun and excitement of motorcycling for many years. Each bike in the range is designed to be easy to use and simple to maintain, and with a range of different sized bikes available there's a model to suit virtually every age from 4 years and upwards.

Designed for older kids who may be graduating from the mid-sized TT-R110 – as well as for adults who want a light and easy-to-maintain fun bike – the TT-R125 is the most powerful in the TT-R line. With its smooth shifting 5-speed transmission and manual clutch, it's an ideal way to develop valuable machine handling skills for the future.

You also get many of the high-spec features associated with Yamaha's bigger motocross bikes, including a disc front brake, electric start and lightweight bodywork. So the TT-R125 can take on tough terrain and – like all TTR-models – Yamaha quality and reliability come as standard.

- 125cc 4-stroke engine with 5-speed gearbox
- Rugged long-travel front and rear suspension
- Freno a disco anteriore, a tamburo posteriore
- Light and tough YZ-inspired Icon Blue bodywork
- Large-diameter wheels
- Rider-friendly performance

Fun for one, fun for all.

Built for youth and adult riders, the TT-R125 is a tough dirt bike that likes to enjoy itself! Rugged, reliable and simple to maintain, this user-friendly off roader is designed for maximum fun with family and friends!

At the heart of this durable off roader there's a compact air-cooled 125cc 4-stroke engine delivering plenty of smooth and controllable power. An electric start makes it easy to get moving, and the 5-speed gearbox allows you to get maximum enjoyment from the TT-R125 – wherever you may go.

The impressive specification includes long-travel front and rear suspension for smooth and confident handling – as well as a 220mm front disc brake, impact-resistant polypropylene bodywork and a 19-inch front wheel and 16-inch rear wheel with knobby tyres. Let the fun begin!

125cc 4-stroke engine with 5-speed gearbox

Driven by a 125cc 4-stroke engine, the TT-R125 delivers plenty of smooth power for spirited off-road riding. Being air-cooled, this punchy little engine requires relatively simple maintenance, and with a 5-speed gearbox and manual clutch, this model prepares the rider for the day when they move up to a more full-sized motorcycle.

Rugged long-travel front and rear suspension

Check out the compact steel frame and rugged suspension systems and you can see that this is a seriously capable off-road motorcycle. The sturdy front forks offer an impressive 180 mm of wheel travel, while the link-type rear suspension gives 168 mm of movement, allowing the TT-R125 to handle some seriously tough terrain.

Front disc brake and rear drum

To handle the TT-R125's punchy performance, the bike is equipped with an efficient 220mm diameter front disc brake that allows the rider to reduce speed with minimum effort. A 110mm drum brake delivers smooth stopping power at the rear end, and for good traction in the dirt the TT-R125 runs on a chunky, 90-section rear tyre.

Light and tough YZ-inspired Icon Blue bodywork

The sharp bodywork on the TT-R125 is inspired by our MXGP-winning YZ motocross bikes. Made from specially developed polypropylene that combines low weight with high strength, the fenders, tank panels and side panels are built to handle some tough treatment. Finished in Icon Blue, the TT-R125 has a genuine race bike image.

Large-diameter wheels

To complement the rugged chassis and long-travel suspension systems, the TT-R125 is equipped with a 19-inch front wheel and a 16-inch rear wheel. This large diameter gives greater ground clearance and enables the TT-R125 to handle uneven off-road surfaces better – for a more enjoyable ride.

Rider-friendly performance

The TT-R125 offers a combination of winning motocross styling, rider-friendly performance and a low seat height, making it ideally suited to both young and adult riders who want to gain valuable off-road experience. With a 5-speed gearbox, large-diameter wheels and YZ-type bodywork, the electric-start TT-R125 delivers a real 'big-bike' experience.

Motore

Motore	Monocilindrico, 4 tempi, Raffreddato ad aria, 2 valvole, SOHC
Cilindrata	124cc
Alesaggio x corsa	54,0 x 54,0 mm
Rapporto di compressione	10,0 : 1
Lubrificazione	Carter umido
Frizione	in bagno d'olio, dischi multipli
Accensione	CDI
Avviamento	Elettrico e a pedale
Trasmissione	Sempre in presa, 5 marce
Trasmissione finale	Catena
Alimentazione	Mikuni VM20/1

Telaio

Telaio	A diamante
Inclinazione canotto sterzo	28°30
Avancorsa	107 mm
Sospensione anteriore	Telescopic fork
Sospensione posteriore	Forcellone oscillante, leveraggi progressivi
Escursione anteriore	180 mm
Escursione posteriore	168 mm
Freno anteriore	Hydraulic Disc, Ø220 mm
Freno posteriore	Mechanical leading trailing drum brake, Ø110 mm
Pneumatico anteriore	70/100-19 42M
Pneumatico posteriore	90/100-16 52M

Dimensioni

Lunghezza	1.885 mm
Larghezza	795 mm
Altezza	1.085 mm
Altezza sella	805 mm
Interasse	1.270 mm
Altezza minima da terra	295 mm
Peso in ordine di marcia (compresi serbatoi olio e carburante pieni)	90 kg
Capacità serbatoio carburante	6,0 L
Quantità olio motore	1,2 L
