

New Own Style

### NOS NS-9

Ready for anything.

Brace yourself and explore your limits with NS-9, the most eclectic helmet of the NS Series range.

Its aerodynamically optimized peak can be removed to configure one of the three different helmet variants (peak and visor – peak only – visor only) making NS-9 the ideal companion for any kind of journey.

The MACH-Efficiency ventilation system has been implemented by doubling the air ducts on the chin guard that together with the fully removable and customizable hand-sewn interiors, ensure maximum comfort to the rider even on the most demanding routes.

Four different size combinations between outer and inner shell for maximum balance of the helmet;

two different EPS densities to optimize impact absorption.

Cross-Over, Road or Off Road, make your choice.

### HOMOLOGATION STANDARD:

- ECE22-06

### OUTER SHELL:

- Realized in HRPolymer
- 2 different shell sizes
- Aerodynamically optimized removable peak

### INNER SHELL:

- EPS realized in two different densities
- 2 different shell sizes

### INNER LINER:

- Realized in Dry-Fresh, anti-microbial transpirant fabric
- Fully removable, washable and customizable
- Emergency Pull system included in cheek-pads
- Removable chin cover
- Intercom system housing

### CHINSTRAP:

- Micrometric, high-sealing, soft touch

### VISOR SYSTEM:

- Equipped with anti-scratch treatment and quick release SR System
- Anti-fog Pinlock system included

### SUNVISOR:

- New mechanism integrated in the shell
- High-capacity darkening optical filter (95%UV) with Anti-Scratch treatment

### VENTILATION SYSTEM:

- MACH-Efficiency aerodynamically optimized
- Double chin guard air intake
- Maximized front air intake
- Maximized exhaust duct
